*I have thoroughly enjoyed every moment of the program at Ross. Every day, I have the opportunity to interact and learn from warm, thoughtful, and engaging faculty and students. The MO department at Ross will prepare you to be a great academic mind through the rigorous training and research development, while also encouraging and supporting growth as a person outside of Ross. Michigan and Ann Arbor are incredibly welcoming and quickly come to feel like home.*

**Research Interests:** Network dynamics, knowledge, complex systems, and emerging markets.

*My experience at Michigan has been fantastic. The faculty conduct cutting-edge research and are dedicated to training the PhD students. They have supported me in pursuing my ideas and helped me develop professionally. I am also so thankful for the terrific community of PhD students. Outside of school, Ann Arbor provides a great outdoors scene and selection of restaurants.*
